The Mission of AGARD

According to its Charter, the mission of AGARD is to bring together the leading personalities of the NATO nations in the fields of science and technology relating to aerospace for the following purposes:

- Recommending effective ways for the member nations to use their research and development capabilities for the common benefit of the NATO community;
- Providing scientific and technical advice and assistance to the Military Committee in the field of aerospace research and development (with particular regard to its military application);
- Continuously stimulating advances in the aerospace sciences relevant to strengthening the common defence posture;
- Improving the co-operation among member nations in aerospace research and development;
- Exchange of scientific and technical information;
- Providing assistance to member nations for the purpose of increasing their scientific and technical potential;
- Rendering scientific and technical assistance, as requested, to other NATO bodies and to member nations in connection with research and development problems in the aerospace field.

The highest authority within AGARD is the National Delegates Board consisting of officially appointed senior representatives from each member nation. The mission of AGARD is carried out through the Panels which are composed of experts appointed by the National Delegates, the Consultant and Exchange Programme and the Aerospace Applications Studies Programme. The results of AGARD work are reported to the member nations and the NATO Authorities through the AGARD series of publications of which this is one.

Participation in AGARD activities is by invitation only and is normally limited to citizens of the NATO nations.

The content of this publication has been reproduced
directly from material supplied by AGARD or the authors.

Preface

This directory resulted from a joint effort by the Advisory Group for Aerospace Research and Development (AGARD) Technical Information Panel. It serves as a reference guide to defense and aerospace information centers. A description of the characteristics of defense and aerospace information centers located in NATO nations is provided for your use. There are ten data fields noted.

Information centers from fourteen countries and some international organizations are included. The directory is distributed to NATO countries as an unclassified, unlimited publication.

Please note that there is a submission/change form at the end of the directory for your use in updating or adding new information centers.

Préface

Cet annuaire résulte d'une initiative de la part du Panel AGARD de l'information technique (TIP). Il sert de guide de référence aux centres d'information de la défense et de l'aérospatiale civile. Il fournit la description des caractéristiques de ces centres dans les différents pays de l'OTAN. Il contient dix champs de données.

Des centres d'information situés dans quatorze pays et dans certaines organisations internationales y sont inclus. L'annuaire est diffusé dans les pays membres de l'OTAN en tant que publication sans classification et sans restriction.

Veuillez noter qu'un formulaire de transmission/changement d'adresse est inclus à la fin de l'annuaire afin de permettre la mise à jour et l'ajout de nouveaux centres d'information.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS BELGIUM

ORGANIZATION

TITLE: Centre National de Documentation Scientifique et Technique (CNDST)

ADDRESS: Bibliotheque Royale
Boulevard de L' Empereur 4
B 1000 Bruxelles

PHONE NUMBER: 32 (2) 519-5640

FAX NUMBER: 32 (2) 519-5679, 519-5645

E-MAIL:

KEY CONTACTS: Mr. E. Lapeysen, and Mrs. I Clemens

Representing the following hosts in Belgium. ESA-IRS; QUESTEL; STN

DESCRIPTION: The CNDST has access to more than 1500 databases on the most diverse range of subjects from all over the world. To retrieve older literature we carry out an additional manual search in the most relevant printed reference works. If you have problems in finding the original document we can advise you where it can be obtained or order a copy for you. We are the Belgian national help desk for the host systems we represent and we'll be glad to assist with any problem.

The CNDST is also the National Aerospace Centre (NAC) in Belgium for the European Space Agency (ESA).

MAJOR PRODUCTS: Classical Library Services

DESCRIPTION:

Library:

- * Automation has started DOBIS-LIBIS
- * 100,000 vol. Scientific and Technical Books and Periodicals
- * Theses (4,000)
- * Biggest part of the collection is of general academic interest
- * Different CD-ROM STI databases (bibliographic, factual, full text)

General Scope:

- * The Royal Military Academy stands for a high level academic education on social sciences, applied and exact sciences

Research:

- * Small research projects are taken on in different fields on a regularly basis for civil, defense and aerospace purposes. Focal points are:
 - * Ballistics: small arms
 - * Physics: contribution to the European Research Projects of Nuclear Fusion
 - * Mechanics: flight mechanics, propulsion lubricants

DESCRIPTION CONTINUED:

which acquires, stores, retrieves, and announces defence-related scientific and technical information, especially reports which are classified or limited in distribution. DSIS provides a unique information resource of over one million documents. These documents include DND scientific and technical reports produced by the Defence Research Establishments, other DND directorates, DND contractors; and defence documents from other Canadian government departments, agencies and universities. DSIS also collects foreign defence documents issued under the auspices of NATO, AGARD, TTCP and other international agreements. DSIS records and accesses the collection through the use of an in-house on-line database (CANDID). DSIS, as the national defence scientific information service, provides services and liaison activities to the international defence community.

MAJOR PRODUCTS: * Bibliographic on-line databases.
* Standard or personalized documentary studies,
library searches, descriptive bulletins.
* Supply or loans of documents.

DESCRIPTION: The Armament Resource Center (CEDOCAR) is responsible for seeking and satisfying the needs of the Ministry of Defense. It is also responsible for the administrations and organizations approved by the Minister of Defense for scientific, technical, industrial, economic, and financial information of any nature concerning armament.

The CEDOCAR belongs to the DGA (General Delegation for Armament) of the Ministry of Defense, it is attached to the DRET (Directorate of Research and Techniques of Armament). Its manpower is 230 people and its annual budget is 100 million Francs.

The CEDOCAR has a media library where the users can consult documents and borrow or reproduce certain ones from among them. The media library holds collections of periodicals, standards, patents, congressional reports, theses, and technical works and reports.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS FRANCE

DESCRIPTION CONTINUED:

The CEDOCAR compiles a bibliographical database which covers all disciplines concerning armament. The notes are written in French and refer to open documents compiled in various languages, mostly in English.

The CEDOCAR is also a host center of bibliographical databases: the above-mentioned CEDOCAR database; AERO database and also databases for which it has acquired a user license: NTIS, INSPEC, METADEX, MATBUS, COMPENDEX, EIMEETINGS, DMT and JAPINFO.

The CEDOCAR has document collections whose information is reserved to competent users having the need to know.

The CEDOCAR creates and distributes documentary products, periodic lists of thematic bibliographical references, standard or personalized, and library searches. It also carries out documentary studies.

Finally, the CEDOCAR is a technical center for documentary information which offers technical assistance and ensures training activities to the profit of the units of documentation of the establishments of the DGA.

- * Reproduction of documents
- ** Bulletin de la Bibliothèque
- ** Bulletin Intérieur d'Information
- ** Technical notes and publications
- ** Activities
- ** Print out of documents presented at congresses
or published in reviews
- ** Nouvelles de l'ONERA
- ** Recherche Aérospatiale (review edited with
Dunod)

DESCRIPTION: This Documentation Department was founded in
1950. Its purpose is mainly scientific, we also
provide administrative and law documents.

- ** 160,000 scientific and technical reports
- ** 13,000 microfiche

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS FRANCE

DESCRIPTION CONTINUED:

- ** 850 subscriptions (serials) but 1,200 titles in our inventory
- ** 1,000 dictionaries and mathematical tables
- ** 40,000 books
- ** 120,000 bibliographic references in our database

SUBJECT COVERAGE:

The main subject areas in our collection are:
aerospace sciences, aeronautics, aerodynamics,
propulsion energetics, optics, physics acoustics,
computer science, chemistry, metallurgy, wind
tunnel tests, and mechanics.

ACCESS:

The library is dedicated to the ONERA's customers,
however, help is provided to librarians outside the
disciplines of aeronautics and space. Students from
universities and scientific schools also consult this
library.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS GERMANY

ORGANIZATION TITLE: Streitkraefteamt / Abt. III
Fachinformationszentrum der
Bundeswehr (FIZBw)

ADDRESS: Friedrich-Ebert-Allee 34
53113 Bonn
Germany

PHONE NUMBER: 49 (228) 947-1374

FAX NUMBER: 49 (228) 947-1385

E-MAIL:

KEY CONTACTS: Col. Dr. Hans-Juergen Rautenberg
(Head)

ACCESS LIMITATIONS: Access to FIZBw is possible for the Federal MoD and its subordinate offices and commands, all agencies of the Federal Armed Forces (FAF); the legislative bodies of the Federal Republic and the Laender, the Supreme and Higher Federal Authorities, NATO agencies, Allied Armed Forces. Special regulations apply for 'non-governmental' organizations, e.g., FAF contractors for R&D purposes.

SUBJECT COVERAGE: Defense-related information, e.g., defense policy, strategy, tactics, armament, military training and education, leadership, psychology and medicine. Research and technology in military related scientific and technical areas such as weapons, electronics and communications, aerospace, ships, materials, economy, management and logistics.

MAJOR PRODUCTS: Automatic Information Service (INFO Series and INFO Special Editions), Military Medicine and Defense Technology Research Reports, Special Report Series, List of Test Reports.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS GERMANY

MAJOR SERVICES: Information Retrieval in internal and external databases, Current Awareness and Ad hoc Services, SDI Service, Full Text Copies.

DESCRIPTION: FIZBw serves as the central agency for documentation and information within the authority of the German MOD. In 1993 it became Division III of the Federal Armed Forces Office. Its mission includes the following main tasks:

- * To procure, select and process documents/pieces of literature, particularly of research reports and studies emanating from the defense community and contractors;
- * To build-up and maintain the central database where all 'document descriptions' are stored;
- * To build-up and maintain the document master collections (hard copies and microfiches);
- * To render Automatic Information Services in the form of periodically published abstract journals (INFO Series) and subject related bibliographies (INFO Special Series);
- * To render Demand Information Services upon specific user request with subsequent supply of updated information (SDI Service) if requested;
- * To supply full text document copies (hard copy or microfiche);
- * To procure documents via other technical information agencies in Germany or abroad.

Input to the database is provided by FIZBw itself and so-called 'decentralized documentation units.' Additionally, selected documentation organizations not belonging to the defense

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS GERMANY

DESCRIPTION CONTINUED:

community, but specialized in certain defense-related disciplines, as well as professional on-pay contributors, work on a contract basis for the center. The data are stored on an IBM mainframe computer at the computation center of the Bundeswehr in Koblenz. The retrieval language is STAIRS. On-line literature searching can be performed in 11 national and international hosts. In its own databases FIZBw stores about 600,000 records of which 66,000 were compiled by the former NVA. About 520,000 documents are available as hard copies or microfiches. Numerous users within the FAF are provided with on-line access to the host computer.

MAJOR PRODUCTS: Aerospace Research

DESCRIPTION: CIRA is an Aerospace Research Center founded in 1984. CIRA main goals are:

- * applied research to meet industries technological to provide scientific support and technical assistance to government and industries;
- * qualified services such as supercomputers and experimental testing facilities together with qualified expertise;
- * research coordination in order to promote know how exchange between academies and industries;
- * since December 1992 CIRA has 126 employees.
- * In the next five years this number is expected to be 500 employees.

Documentation Center:

The main aim of the CIRA Documentation Center is management, retrieval and the dissemination of technical and scientific information for the CIRA researchers and for the Italian aerospace community. The Documentation Center has:

- * technical library
- * on-line references service
- * off-line documents retrieval service
- * publishing

**SUBJECT
COVERAGE:** Multi-disciplinary library

MAJOR PRODUCTS

AND SERVICES:

- * Information retrieval from in-house bibliographic database and CD-ROM;
- * Selective Dissemination of Information;
- * New acquisitions bulletin;
- * Reading room and loans desk;
- * Documentation and information interchange with external institutions based on AGARD reports;
- * Periodicals circulations;
- * Document delivery (periodicals, AGARD, Technical Orders).

DESCRIPTION: According to its terms of reference, the PoAF Documentation Centre has the following main tasks:

- * To purchase, process and manage the scientific and technical documentation and information necessary to support operational activities, staff training and the management of human, material and financial resources;

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS PORTUGAL

DESCRIPTION

CONTINUED:

- * To purchase, control and distribute all technical orders related with aircraft and weapons systems;
- * To support all POAF branches in terms of scientific, technical and legislative documentation and information, by means of general and selective dissemination;
- * To organize and control local libraries and information nucleus;
- * To study and propose the establishment of links with other documentation and information structures, either military or civilian, national or international.
- * In terms of organization, CDIFA is composed of the POAF Main Library, Information Services Sector, Documentation Analysis Sector and a Technical Orders Sector.

MAJOR PRODUCTS

AND SERVICES:

- * INFOLNETI database (35,000 records covering mainly Science and Technology);
- * Advanced Training in Information Management;
- * Information Intermediaries for Industry;
- * MSc Information Management (in collaboration with University of Sheffield, United Kingdom);
- * Reading Room;
- * Document delivery (from internal and external sources);
- * On-line database search services (from internal and external databases);
- * National Focal Point/National Awareness Partner of the EU Programme IMPACT 2.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS PORTUGAL

DESCRIPTION: The Technical Information Center for Industry of INETI goal is to optimize the transfer of information for industry. At an internal level, the Technical Information Center for Industry allows the researchers and technical staff of INETI access to information sources which are important to their research, development and demonstration activities, through central library services, on-line databases searches, current awareness, and selective dissemination of information.

At an external level, the technical Information Centre for Industry grants the same services to the scientific community, in general, and in addition aims to serve the business community with products and services that specifically relate to them, such as:

Reference services for information sources
Fast question/answer services

Information Dossiers/Information Packs
For a specific problem, one can collect, analyze and interpret the relevant information available either in the country or abroad so as to build the knowledge basis or "intelligence" required to take informed decisions.

Training and Awareness
The Technical Information Centre for Industry provides a wide range of training and awareness actions in the use and management of information:

- * Seminars for the diffusion of information sources and services.
- * Seminars to demonstrate how to use the on-line databases available.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS PORTUGAL

DESCRIPTION CONTINUED:

Advanced Training in Information Management

The MSc in Information Management, in collaboration with the University of Sheffield, United Kingdom, is a co-organizer of the Msc in Electronic Information Management, within the framework of the EU impact2 programme.

Information on IMPACT 2 Programme

The Technical Information Centre for Industry has firsthand access to information about the IMPACT 2 programme activities and opportunities through a close collaboration with the Central Support Team in Luxembourg.

Information about "calls for proposals" and "calls for tenders" in the information services area is disseminated to target-groups, according to interest, through mailings, seminars and workshops and to all those who contact CITI directly.

MAJOR PRODUCTS: A database for serials, Turkish theses, printed catalogs of theses and subscribed serials.

DESCRIPTION: Established in 1983, the documentation center mainly collects serials. It has a subscription to 10,000 titles covering almost all subjects. Also, since 1987, thesis (MA, MS, Ph.D) prepared at the Turkish universities are collected, reaching over 16,000 at the present. Yearly acquisition is around 4,000. There is a microfiche collection (ERIC) totaling 160,000 items. Some general reference materials are also available. The entire collection consists of over 500,000 items. The center has two databases that can be accessed through the network. Thesis and serials, both by title. The services include photocopying, on-line and CD-ROM searching, thesis and serials database which could be accessed through TUVAKA, a network among universities, searching and reference. One of the major services of the center is photocopying. The number of pages yearly provided to researchers are about 900,000.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS TURKEY

DESCRIPTION

CONTINUED:

On-line literature searching is done through DIALOG since 1984. In 1993 ERS and DIMDI were added. Yearly total on-line search number is about 9,000. ERIC, CAB, MEDLINE, BIOLOGICAL

ABSTRACTS, ABI/INFORM and COMPENDEX are used for retrospective searches.

The center gives service mainly to university staff, graduate students, and individuals working in other institutions who need information for research.

COVERAGE

CONTINUED:

BRISTOL: 10,000 Volumes, 80 current periodicals. Standards and specifications. Comprehensive collection of NASA & ESA reports. Subject coverage: Space; Satellite Technology; Launch Vehicles; Astronomy; Earth Observation; Remote Sensing & Astrophysics; Health & Safety.

SERVICES:

The BAe Space Systems Ltd. Central Library & Information resource has units on both its Stevenage and Bristol Sites which provide facilities for staff to keep abreast of current technology, update expertise, pursue further research, obtain technical documentation, and assist in the provision of information geared to our specific business environment.

Books, directories, periodicals, external reports, conference proceedings and major abstracting journals of worldwide aerospace published literature are held. Literature searches of in-house stock are carried out from the CAIRS (Computer Aided Information Retrieval System). Our own documentation is supplemented by borrowing from the British Library Document Supply Centre and the librarians maintain contact with many other major industrial/academic libraries in the UK. Literature searches may be conducted on a large number of technical and commercial databases including those available via ESA-IRS and DIALOG.

Current awareness listings of published literature.

Translations of scientific and technical documents.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED KINGDOM

- SERVICES:**
- Searches of in-house databases and indexes.
 - Provision of controlled circulation documents for MOD UK and its contractors.
 - Distribution of documents within UK and overseas in accordance with the originator's requirements and security considerations.
 - Translation of scientific and technical documents.
- DESCRIPTION:**
- DRIC is part of the UK Ministry of Defence Chief Scientific Advisor's organization, and is the central facility for collection, distribution, archiving and dissemination of controlled-circulation scientific and technical material. Such material is usually the result of research, development of trials work. Documents are collected both from the UK and as a result of International Information exchange agreements, and are catalogued and documented by scientific staff, resulting in an in-house database which is exploited in various ways to provide DRIC's information products, but which is not available for on-line access.
- Ministry of Defence and Defence Research Agency branches have access to the full range of services detailed above; contractors and organizations working on government projects can also receive certain products.
- All products and services are provided on a need-to-know basis.

MAJOR PRODUCTS: NASA STI Program products include the NASA formal report series (Conference Publications, Contractor Reports, Reference Publications, Technical Memorandums, Technical Papers, Technical Translations, and Special Publications) and a wide range of bibliographic tools. Two of the best known and most popular of these tools are STAR (Scientific and Technical Aerospace Reports) and NOVA (NASA Open Volumes on Aerospace). Published monthly, these companion abstract and index journals contain announcements of R&D reports and journals contain announcements of R&D reports and journal articles in 76 aerospace related categories.

NASA STI Program services include information management consultation and such varied tasks as performing literature searches, building databases, providing original photography and graphics, publishing NASA research, creating custom thesauri, and translating documents to or from 34 foreign languages.

DESCRIPTION: Founded in 1958, the National Aeronautics and Space Administration (NASA) is the civilian agency that oversees the internationally renowned U.S. space program. Since its founding, NASA has been dedicated to ensuring U.S. leadership in aeronautics and space science. The NASA Scientific and Technical Information (STI) Program plays an important part in helping NASA maintain that leadership role.

Headquartered in Washington, DC, the NASA STI Program offers researchers access to the largest collection of aeronautical and space science STI in the world. The Program is also NASA's institutional mechanism for disseminating the results of its

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

DESCRIPTION

CONTINUED:

research and development activities.

The NASA STI Program provides access to an array of additional databases around the globe ... producing an unrivaled aerospace information network. A number of specialized services help round out the Program's diverse offerings.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

ORGANIZATION

TITLE: Defense Technical Information Center (DTIC)

ADDRESS: Defense Technical Information Center
Cameron Station, Building 5
Alexandria, VA 22304-6145
USA

PHONE NUMBER: +1-800-225-3842

FAX NUMBER: +1-703-617-7718

E-MAIL: ryan@dgis.dtic.dla.mil.us

KEY CONTACTS: Kurt N. Molholm, Administrator
R. Paul Ryan, Deputy Administrator
703-274-6800, 703-274-6882

ACCESS

LIMITATIONS: DTIC products and services are available to DoD and its contractors and to other U.S. Government agencies and their contractors. Organizations may also become eligible for service under the Potential Defense Contractors Program, the Historically Black Colleges and Universities Program, the University Research Initiative Program, or the Small Business Innovation Research Program.

SUBJECT

COVERAGE: Research and technology in all areas of military science such as aeronautics, missile technology, navigation and nuclear science. DoD has a wide interest to include such subjects as: biology; chemistry; energy; environmental sciences; oceanography; computer sciences; sociology; and human engineering.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

MAJOR PRODUCTS

AND SERVICES:

- Technical Report database
- Work Unit Information System (WUIS) database
- Independent Research & Development (IR & D) database
- Manpower and Training Research Information System (MATRIS)
- Defense RDT and E On-line System (DROLS)
- Automatic Document Distribution System (ADD)
- DoD Gateway Information System (DGIS)
- Automatic Magnetic Tape Distribution (AMTD)
- Technical Report Database on CD-ROM
- World Wide Web Server

DESCRIPTION:

DTIC is the central point within the Department of Defense (DoD) for acquiring, storing, retrieving and disseminating Scientific and Technical Information (STI). This includes information in support of the DoD research, development, engineering, and studies programs. DTIC also provides direct support to the office of the Under Secretary of Defense for (Acquisition). Other services include: customized subscription products; on-line connection services to other federal, foreign and domestic commercial databases; technical reports, bibliographies and referrals; and access to specialized DoD centers of expertise and information.

DTIC acquires documents and non-print products generated by or for DoD. Among the information DTIC receives are technical reports; technical notes; technical memoranda; bibliographies; documents relating to planned, ongoing, and completed research, development, test, and evaluation; software, data files, and databases; and videotapes.

DTIC's major databases include summary descriptions and references to planned, ongoing, completed, and independent research and development efforts. The Research and Technology Work Unit Information System (WUIS) contains summaries of ongoing DoD research and technology efforts at the work unit level.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

DESCRIPTION CONTINUED:

The Manpower and Training Research Information System (MATRIS) supports technical information needs of the Training and Personnel Systems Technology community. The MATRIS database is only accessible by U.S. Department of Defense organizations.

DTIC's World Wide Web Services are a source for finding information about, and of interest to the United States Department of Defense. The DTIC Web Server may be accessed via the internet using a Web client such as MOSAIC. The universal resource locator is [http: //www.dtic.dla.mil](http://www.dtic.dla.mil).

DTIC's role is to ensure that all significant scientific or technological observations, findings, recommendations and results derived from DoD endeavors are accessible to authorized users. Services are available to U.S. Government organizations and their contractors. Others register for DTIC services under the Potential Defense Contractors Program, the Historically Black Colleges and Universities Program, the University Research Initiative, and the Small Business Innovation Research Program.

TITLE: National Library of Medicine (NLM)

ADDRESS: National Library of Medicine
8600 Rockville Pike
Bethesda, MD 20894

PHONE NUMBER: 301-496-6221
1-800-272-4787 (General Information)

FAX NUMBER: 301-496-4450

E-MAIL: smith@lhcnlm.nih.gov
siegel@nlm.nih.gov

KEY CONTACTS: Kent A. Smith, Deputy Director 301-496-6661
Elliot R. Siegel, Ph.D., Associate Director for Health
Information Programs Development 301-496-8834

ACCESS

LIMITATIONS: NLM products and services are available to individuals and institutional users in the United States and abroad. NLM also serves as a national resource for all U.S. health science libraries.

SUBJECT

COVERAGE: Within its broad mission to collect materials pertinent to medicine, NLM collects scholarly literature in the fields of medicine concerned with the health affects of air and space flight. Basic research materials in space medicine as it applies to human health and physiology are collected, although plant physiology is not. Since NLM's general subject coverage is extremely broad, space medicine may be included in such subjects as biology, medical informatics, behavioral sciences, and human engineering.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

MAJOR PRODUCTS

AND SERVICES: Bibliographic and factual databases on all aspects of medical, health care delivery and research, and toxicology information. These include information related to space medicine. Services include document delivery, historical collections, research and development in medical informatics and biotechnology.

DESCRIPTION:

The National Library of Medicine (NLM) is the world's largest research library in a single scientific and professional field. The Library collects materials exhaustively in all major areas of the health sciences and to a lesser degree in such areas as chemistry, physics, botany and zoology. The collections today stand at 5 million items--books, journals, technical reports, manuscripts, microfilms, and pictorial materials. Housed within the Library is one of the world's finest medical history collections of rare medical texts, manuscripts, and incunabula.

The Library's extensive collections and information services may be used by health professionals and health-science students. Books and journals may be consulted in the reading room; they may also be requested on interlibrary loan.

NLM serves as a national resource for all U.S. health sciences libraries. Lending and other services are provided through a National Network of Libraries of Medicine (NN/LM™) consisting of 3,500 'primary access' libraries (Mostly at hospitals), 125 Resource Libraries (at medical schools), 8 Regional Libraries (covering all geographic regions of the U.S.) and the NLM itself as a national resource for the entire Network. More than 2 million interlibrary loan requests are filled each year within this Network.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

MEDLARS®

The Library's computer-based Medical Literature Analysis and Retrieval System (MEDLARS®) was established to achieve rapid bibliographic access to NLM's vast store of biomedical information. Over the years of its evolution, MEDLARS has come to represent a family of databases of which the MEDLINE® database is the most well known. Essentially Index Medicus, on-line, MEDLINE enables individuals and organizations with computer terminals to query the NLM computer's store of journal article references on specific topics. MEDLINE currently contains seven million references going back to 1966.

All of the MEDLARS databases are available through NLM's on-line network of more than 70,000 institutions and individuals in the United States. They performed some 6 million searches in 1994. User fees are charged by NLM to recover the full costs of providing access to the system. The availability of the user-friendly microcomputer-based access software, GRATEFUL MED®©, has resulted in an upsurge of individual health professionals joining the NLM network. Access to the MEDLINE database is also available through commercial and academic networks, and on CD-ROM from several private companies.

KEY CONTACTS: Donald R. Johnson, Director
703-487-4636

**ACCESS
LIMITATIONS:** None

**SUBJECT
COVERAGE:** Defense and aerospace coverage include more than 550,000 titles from the National Aeronautics and Space Administration and the Departments of Defense and Energy. The collection also includes other scientific, technical, business and management reports, manufacturing studies, translations of foreign reports, foreign and domestic trade, general statistics, environment and energy, health and the social sciences, and many other areas. Coverage is worldwide; nearly one-third of new titles are from foreign sources.

MAJOR PRODUCTS:

- More than two million technical information items
- NTIS Bibliographic Database
- Federal Research In Progress (FEDRIP) Database
- Government Reports, Announcements, and Index Journal
- Software and computerized data files
- Selected Research in Microfiche

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

MAJOR SERVICES: Technical Information Ordering and Delivery.

FedWorld is an on-line information service. It provides a user-friendly, central resource for government information in electronic format. It is accessible from the Internet and by dial-up, at no charge. This gateway to more than 60 different government agencies and program serves clients with limited experience and those that are more sophisticated. The FedWorld Marketplace is a unique area within FedWorld that allows customers to purchase certain products on-line.

DESCRIPTION:

The National Technical Information Service (NTIS) is a self-supporting agency of the U.S. Department of Commerce that actively collects, organizes, and distributes technical information generated by United States and foreign governments in all areas of science and technology. The NTIS collection exceeds two million works, all of which are permanently available. Approximately 90,000 new works are added each year. In addition to printed reports and documents, NTIS provides government generated computer software and computerized data files on tape, diskette, and CD-ROM through its Federal Computer Products Center. In recent years, NTIS has increased its holdings in the area of foreign technology -- up to a third of the reports entering the collection are from foreign sources.

The NTIS Bibliographic Database contains summaries of items in the collection from 1964 to the present. It is updated twice a month and is available on-line via the following vendors: CD-PLUS Technologies (800) 950-2035; Canada Institute for Scientific and Technical Information, (613) 993-1210; Dialog/Data-Star, (800) 221-7754; ESA/IRS in Italy, fax +11 39/6 94180361; NERAC, Inc. (203) 872-7000; Questal.Orbit, Inc. (800) 955-0906; STN International, (614) 447-3600.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS UNITED STATES

DESCRIPTION

CONTINUED:

On-line access to ongoing U.S. research is available on the Federal Research in Progress (FEDRIP) Database. DIALOG and Knowledge Express offer this database.

NTIS operates the CALS/CE Information Center to promote the widespread understanding, acceptance, and use of CALS principles through an effective flow of CALS-related technical information including standards and specifications, technical reports, training materials, computer data files, and the CALS/CE electronic bulletin board system available on FedWorld.

FedWorld is an NTIS pilot project which provides 1) an electronic gateway to selected U.S. Government systems, 2) other information resources such as databases, software, press releases, and 3) a one-stop shopping center for news about Government reports, software, and CD-ROM projects. The FedWorld Internet address is fedworld.gov.

ORGANIZATION

TITLE: Shape Technical Centre

ADDRESS: P.O. Box 2501 CD
The Hague
The Netherlands

PHONE NUMBER: 31 70 3142100

FAX NUMBER: 31 70 3142111/2

E-MAIL: walker@stc.nato.int

KEY CONTACTS: Head, Information and Registry Services

ACCESS

LIMITATIONS: Services are generally limited to SHAPE Technical Centre Personnel and employees of the NATO Organization. Enquiries from NATO Nations will be accepted on a case-by-case basis, preferably when channelled via national defence authorities.

SUBJECT

COVERAGE: Defence-command and control systems, communications, information systems and operations research.

MAJOR PRODUCTS

AND SERVICE: Scientific and technical publications: reports, conference proceedings, bibliographies and databases.

DESCRIPTION:

Shape technical centre is a NATO agency subordinate to the Supreme Headquarters Allied Powers Europe (SHAPE). The centre acts as a technical advisory body to the Supreme Commander Europe (SACEUR) performing scientific defence research using state of the art test beds, simulations and information systems. STC accepts commissions from other NATO bodies when

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS INTERNATIONAL

DESCRIPTION CONTINUED:

supported by SACEUR. Typical projects involve coordination across national systems and may result in prototype systems, reports and direct advice to the military/operational element of NATO.

ACCESS

LIMITATIONS: None for unclassified publications

PRODUCTS: Scientific and technical publications

DESCRIPTION: AGARD (the Advisory Group for Aerospace Research and Development of NATO) is a coordinating agency that arranges meetings, lecture series and courses, sponsors publications, and supports the interchange of experts between NATO nations. It also provides technical assistance to Greece, Portugal and Turkey.

AGARD unclassified publications are freely available. Each NATO nation has a distribution centre for AGARD publications; and there are also three sales agencies that sell photocopies or prints from microfiche, in the US, UK and France. These are all listed on the back cover of this publication. In addition, AGARD HQ sells original copies of

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS INTERNATIONAL

DESCRIPTION

CONTINUED:

publications, within the limit of available stocks.

AGARD has published a series of 3-year indexes to its publications. They contain full bibliographical details and abstracts of each publication and its constituent papers, as well as subject, personal author and corporate source indexes. Copies should be available from the sources listed in the previous paragraph.

The same information, up to 1993 (and possibly later), is available on a 4.7" CD-ROM which also contains similar information about NATO Scientific Affairs Division publications (NATO Advanced Scientific Institutes, etc). This disc is available from:

FAX NUMBER: (39/6) 94180653

E-MAIL: GMUEHLHA@ESRIN.BITNET

KEY CONTACTS: Gerd A. Muehlhauser, H/IRS

ACCESS

LIMITATIONS: ESA-IRS is a public service within all the ESA Member States. Users have access to all databases, but can be excluded from private data. Non-Member State access is governed by an ESA Delegate body.

SUBJECT

COVERAGE: Scientific and Technical reference information with system support to reach/order the complete information in the area of aerospace, transport, materials, chemistry, environment, earth observation, life sciences.

MAJOR PRODUCTS AND SERVICES:

Operation of a classical on-line information retrieval service, including related support services like SDIs, and on-line document ordering.

DESCRIPTION:

The ESA-IRS collection of databases and databanks contains more than 50 million records with a broad scope of information. There is reference material and factual data as well as the full text of many publications.

DIRECTORY OF DEFENSE AND AEROSPACE INFORMATION CENTERS INTERNATIONAL

DESCRIPTION CONTINUED:

Reference records may be directory entries referring to companies or products; or they may be bibliographic citations and abstracts describing journal articles, conference papers or other original sources. Data records may describe specific properties of materials or components or they may give financial information about a particular company. Full-text records are typically of news items. All files are regularly updated, giving the user access to the most recent information. Many of them are unique to ESA-IRS.

14. Abstract <p>The Directory of Defense and Aerospace Information Centers is a reference guide to information centers located in NATO Nations. The information provided represents submissions from forty eight information centers across fourteen countries.</p> <p>The guide provides assistance in locating scientific and technical information resources from several countries' information centers. Points of contact are provided for each center. The directory includes information on: points of contact, subject coverage, description of major products and services, access limitations where applicable, e-mail addresses, phone and fax numbers. An index to centers by organizational title is included for quick reference.</p>													

Aucun stock de publications n'a existé à AGARD. A partir de 1993, AGARD détiendra un stock limité des publications associées aux cycles de conférences et cours spéciaux ainsi que les AGARDographies et les rapports des groupes de travail, organisés et publiés à partir de 1993 inclus. Les demandes de renseignements doivent être adressées à AGARD par lettre ou par fax à l'adresse indiquée ci-dessus. *Veillez ne pas téléphoner.* La diffusion initiale de toutes les publications de l'AGARD est effectuée auprès des pays membres de l'OTAN par l'intermédiaire des centres de distribution nationaux indiqués ci-dessous. Des exemplaires supplémentaires peuvent parfois être obtenus auprès de ces centres (à l'exception des Etats-Unis). Si vous souhaitez recevoir toutes les publications de l'AGARD, ou simplement celles qui concernent certains Panels, vous pouvez demander à être inclu sur la liste d'envoi de l'un de ces centres. Les publications de l'AGARD sont en vente auprès des agences indiquées ci-dessous, sous forme de photocopie ou de microfiche.

The British Library
Document Supply Division
Boston Spa, Wetherby
West Yorkshire LS23 7BQ
Royaume-Uni

Les demandes de microfiches ou de photocopies de documents AGARD (y compris les demandes faites auprès du CASI) doivent comporter la dénomination AGARD, ainsi que le numéro de série d'AGARD (par exemple AGARD-AG-315). Des informations analogues, telles que le titre et la date de publication sont souhaitables. Veuillez noter qu'il y a lieu de spécifier AGARD-R-nnn et AGARD-AR-nnn lors de la commande des rapports AGARD et des rapports consultatifs AGARD respectivement. Des références bibliographiques complètes ainsi que des résumés des publications AGARD figurent dans les journaux suivants:

Scientific and Technical Aerospace Reports (STAR)
publié par la NASA Scientific and Technical
Information Division
NASA Headquarters (JTT)
Washington D.C. 20546
Etats-Unis

Government Reports Announcements and Index (GRA&I)
publié par le National Technical Information Service
Springfield
Virginia 22161
Etats-Unis
(accessible également en mode interactif dans la base de
données bibliographiques en ligne du NTIS, et sur CD-ROM)

AGARD holds limited quantities of the publications that accompanied Lecture Series and Special Courses held in 1993 or later, and of AGARDographs and Working Group reports published from 1993 onward. For details, write or send a telefax to the address given above. *Please do not telephone.*

AGARD does not hold stocks of publications that accompanied earlier Lecture Series or Courses or of any other publications. Initial distribution of all AGARD publications is made to NATO nations through the National Distribution Centres listed below. Further copies are sometimes available from these centres (except in the United States). If you have a need to receive all AGARD publications, or just those relating to one or more specific AGARD Panels, they may be willing to include you (or your organisation) on their distribution list. AGARD publications may be purchased from the Sales Agencies listed below, in photocopy or microfiche form.
